

# LOL TOKEN WHITEPAPER

---

**LOL Token is a memecoin that was created to bring joy and laughter to the world. It is based on the popular internet meme “LOL,” which stands for “laugh out loud.” LOL Token is designed to be a fun and lighthearted way to interact with the cryptocurrency community.**

**The cryptocurrency market can be a serious and sometimes even daunting place. LOL Token aims to make the market more fun and accessible by providing a way for people to invest in cryptocurrency without having to worry about their investment**

# UTILITIES DETAILS

- 1. LOL Token is a deflationary token, which means that the supply of tokens will decrease over time with weekly buybacks and burn. This makes LOL Token a valuable asset that can appreciate in value over time. LOL Token is also designed to reward it's holders with increase in value from huge buybacks and burns and it's Nft holders 10% return weekly in usdt depending on the type of NFT held. There will be three different tiers of NFTs; Gold  (0.4 ETH ), silver  (0.2 ETH) and bronze (0.1 ETH)  . 50% of the marketing funds goes to the NFT rewards pool as well as the minting fees. Very limited number of NFTS**

**(initial 50 total supply of NFTs) so grabbing one as soon as you can is your best bet because it'll be instant sell out. We'll have more Nft supply when the project's main utility is live and more revenue comes in to reward Nft holders but the next Nft batch supply will be 2x the initial 50 supply as well as there will be increase in reward for holders too**

- 20 Gold NFTs**
- 15 Silver NFTs**
- 15 Bronze NFTs**

**2. NFT REWARDS: LOL  
TOKEN NFTs are designed to reward holders with 10% return weekly in Usdt. The**

**return depends on the tier being held. For instance a holder of the Gold NFT should expect a 10% return of 0.4 ETH but in usdt, the rewards will be distributed manually to all holders meanwhile there's a dashboard where all NFT holders can track their rewards. The NFTs prices tends to increase as the project proceeds**

**3. NFT STAKING: This is exclusive to NFT holders. NFTs holders will be able to stake their**

**NFTs to collect more tokens  
asides the weekly reward  
distribution in usdt. The gold  
NFTs will give 1000 tokens daily  
return after being staked, Silver  
NFTs will give 600 tokens return  
while Bronze NFTs will give 300  
tokens in return daily. The daily  
returns on each tiers will be  
increased as the project proceeds.  
This coupled with the burns and  
buybacks, supply shock is  
imminent**

**SURPRISE UTILITY REVEAL**

The surprise utility will be beneficial to everyone, including both NFT holders and token holders. It'll be an income generating utility that'll increase the value of the token itself with huge buybacks and generate more revenue for nft holders. The details of the surprise utility will be revealed in due course. It's a kind of utility that'll knock investors off their shoes, we're confident that this utility will add significant value to the project and the community.

## **Tokenomics**

The total supply of LOL Token is 100 million tokens. The initial circulating supply will be 90 million tokens, and the remaining tokens will be given to the community through a variety of contest, such as riddles, activity contests and all forms of random competitions

5% Buy and sell tax

**TAX ECOSYSTEM**

30% Nft rewards

70% marketing and buybacks
